

# THE TEN "PLANETS"

The Sun and Moon are considered "luminaries" not planets.

Rulerships shown are based on traditional astrology before Uranus, Neptune and Pluto were discovered. Modern astrology assigns Uranus to Aquarius, Neptune to Pisces, and Pluto to Scorpio.

**Rulership**  
Planet has full power to express its natural significations.

**Exaltation**  
Planet is able to express its natural significations in a positive way.

**Detriment**  
Planet has weakened or non-existent power to express its natural significations, or misuses its power.

**Fall**  
Planet has minimal strength to express its natural significations.
